

About BeVera

BeVera Solutions is a veteran-owned, SBA 8(a) certified small business dedicated to delivering valuable Technical, Professional, and Administrative Support Services to the CDC. With a laser focus on providing highly-qualified resources and highly-responsive management, BeVera has been awarded 18 prime contracts and over 40 training orders across 10 CIOs since 2020.

BeVera is dedicated to providing mission-critical Technical and Administrative support services for all aspects of CDC's mission. BeVera successfully performs as a prime contractor for the following CDC CIOs:

- GHC (formerly CGH)
- NCEZID
- NCIRD
- NCIPC
- NCEH
- NIOSH
- NCDDPHP
- CPR
- CSELS
- HRO / CDC University

Current and Past Performance

Data Management and Analysis: BeVera specializes in Data Quality Support Services, delivering comprehensive program evaluation planning, data analysis, and result presentation for NCIRD's Immunization Services Division (ISD). Additionally, we provide vital support to GHC's Division of Parasitic Diseases and Malaria (DPDM) by enhancing access, integration, analysis, and visualization of malaria data. Our skilled data specialists possess expertise in a wide array of management and analysis techniques, which include:

- Data Visualization
- Statistical Analysis
- Formative & Process Research
- Impact Evaluation
- Data Integration
- Data Quality Assurance

Health Communications: With a strong background in health communication, BeVera offers a comprehensive range of services tailored to effectively promote our clients' projects, programs, and initiatives. We are successfully delivering expert health communications services to multiple CIO's including GHC's Office of the Director (OD), GHC's Global Immunization Division (GID), NCDDPHP's Division of Reproductive Health (DRH), NCEH's OD, NCEZID's One Health Office, and NCIRD's Immunization Services Division (ISD). Our services include:

- Technical Writing/Editing
- Speechwriting
- Media/Social Media Engagement
- Infographic/Data Design
- Publication Development
- Presentation Design
- Web Content Design/Management

Epidemiology: BeVera performs primary and secondary data analysis and synthesis from disease surveillance and studies on behalf of NCEZID's One Health Office. Our experts also monitor program and health objectives and provide epidemiology training to country-level partners to strengthen surveillance systems as a part of GHC's Division of Global HIV and TB's (DGHT) international surveillance efforts. In addition, we are providing critical epidemiological services to combat Malaria in over 25 sub-Saharan countries for GHC's Division of Parasitic Diseases and Malaria (DPMD).

- Disease Surveillance and Monitoring
- Study Design and Implementation
- Data Analysis and Interpretation
- Public Health Investigations
- Risk Assessment and Communication
- Epidemiological Modeling

Laboratory Services: BeVera performs Malaria Laboratory Research on behalf of GHC's Division of Parasitic Diseases and Malaria (DPDM) and has past performance administering Field Testing and Phlebotomy Services on behalf of NCEZID's Division of Healthcare Quality Promotion (DHQP). Our work has provided critical information on diseases to inform clinical knowledge and interventions. BeVera's laboratory services capabilities include:

- Experimental Design
- Sample Collection and Cold Chain Logistics
- Data Collection and Analysis
- Literature Review
- Quality Control and Assurance
- Research Collaboration

Technical and Administrative Staffing: BeVera specializes in offering high-quality technical staffing solutions to fulfill the diverse needs of our esteemed CDC clients. Our extensive candidate pool allows us to meet the immediate demands of our clients. Our candidate pool includes, but is not limited to the following labor categories:

- Health Communications Specialists
- Data Analysts / Statisticians
- Public Health Analysts
- Administrative Assistants
- Budget/Financial Analysts
- Epidemiologists
- Technical Writers/Editors
- Subject Matter Experts
- IT Support Specialists
- 508 Compliance Specialists
- International Health Scientists
- Data Scientists
