Data Science and Leadership Training

Strategy and Decision-Making

In this course, we will explore the fundamentals of strategic planning, decision-making, goal setting, and sustaining, leveraging, and growing organizations. Through interactive discussions, you will have the opportunity to learn how to develop effective strategic plans, make informed decisions, and set achievable goals. We will also discuss the best practices for implementing and sustaining organizational growth and how to leverage existing resources to achieve your goals.

By the end of the course, you will have gained valuable insights into the strategic planning process and decision-making techniques. You will also have a better understanding of how to leverage resources to achieve your goals and the importance of effective decision-making in achieving organizational success.

About Our Trainer

Joe Martore is a Registered Professional Engineer with over 40 years of engineering and management experience. He is a subject matter expert in the areas of management systems, strategic planning, risk management, leadership development, and business growth.
