

# BeVera

## TRAINING SYLLABUS

# EDA II - Data Wrangling

## Course Overview

The EDA II course is an introduction to data wrangling which is the process of getting data into a useful form for visualization and modeling. Data Analysis can be divided into three parts: Extraction, Transform and Visualize. During this course, attendees will learn to visualize and summarize their data in preparation for more advanced analysis.

## Intended Audience

This Exploratory Data Analysis in R course is intended for individuals, data analysts, data scientists and researchers that have a working knowledge of the R programming language.

## Prerequisites

Attendees must download the R and the RStudio IDE onto their personal laptops.

## Learning Objectives

- ✔ Learn to work with the most useful data manipulation packages in R
- ✔ Learn the basic vocabulary of dplyr
- ✔ Determining important features and patterns in the data and any unusual nonconformities
- ✔ Learn to invoke basic EDA methods to understand datasets in preparation for more advanced analysis
- ✔ Discuss what the data tells us? (In contrast to “confirmatory” data analysis)
- ✔ Learn 5-Number summary, Box plots, Stem and Leaf Diagrams
- ✔ Learn Extremes (min and max), Median & quartiles
- ✔ Identify more robust to skewed & long tailed distributions
